

The Canadian government announced that there will be three Winnipeg companies who will receive financial support from the Government of Canada. Three innovative enterprises in Manitoba will be able to quickly and efficiently bring their products to the market with today's investments of the Government of Canada in the amount of \$4.5 million.

Complex Games is a gaming company who will be able to bring its product to the digital market with the financial support from the Government of Canada. An advanced engineering company, Sightline Innovation will be able to commercialize its quality control product. GORP, a power bar company will be able to produce a ready-mix energy bar product that will reach a wider market. As these companies transfer their products to the market, it is expected to create more than 90 middle-class jobs in Canada.

The funding demonstrates the commitment of the Government of Canada to the development of innovations in Canada. It is based on promoting Western Canadian business interests in the international market.

The 2017 budget provided an innovation and skills plan in Canada to turn Canada into the world's leading innovation center to help create better-paying jobs and help strengthen and develop the middle class.
